COST SAVINGS

- AV minimums can be applied to discount or possibly waive room rental
- Waived fees for AV electrical
- Waived fees for lift rental
- Waived fees for ballroom accent lighting
- Waived fees for patching into house sound

EXCELLENT EXECUTION

"It was enjoyable getting our Bluz Brothers organized on stage and sounding great. Please thank [your team] for the excellent tech support during our seminars. Thanks for making me look good!"

Over the years, we have worked with a lot of meeting and conference planners and you and your teams rank at the very top of the list! Keep up the great work. "

HYBRID EVENTS

Offering fully interactive & engaging virtual experiences to supplement your physical event, we are the all-encompassing hybrid event venue. Live-stream your conference or meeting to increase ROI by reaching on-site & virtual audiences. Engage more members & increase your bottom-line with hybrid meetings.

COMPLETELY CUSTOMIZABLE PACKAGES

- Secure live streaming services for unlimited online guests
- Stream live or recorded content & share recordings post-event
- Broadcast streams to multiple platforms
- Branded online registration & stream
- Remote speakers/panel discussions live from remote locations
- Virtual lobby for attendees/exhibitors to interact
- Multiple camera angles, including picture-in-picture content
- Professional customizable equipment
- Branded backdrops, professional staging & décor
- Simplified fundraising with 'Click to Donate'
- Training & coordination with all speakers to test remote setup, lighting, etc. in advance
- Interactive platforms including social media integration, Q&A, live chat & polling
- Dedicated event management & audiovisual tech support to ensure smooth event transitions
- Hybrid event options include meetings, conferences, lectures, banquets, galas, fundraisers, trade/consumer shows, conventions, training seminars, workshops, career fairs & more

ONLINE PRESENTATION CONTENT CAPTURE

The Overland Park Convention Center introduces Online Presentation Content Capture (OPCC), a groundbreaking new technology that leaps beyond traditional hybrid solutions. Our innovative approach provides a more affordable and efficient method for capturing and sharing content from meeting breakout sessions, conferences, and events.

HOW IT WORKS

- **Accessibility** Our technology ensures that valuable content is accessible to everyone, including those who couldn't attend the event in person. Whether it's individuals unable to physically attend or participants who want to review the material later, we make it easy to access the content.
- **Post-Event Availability** Following the event, all captured content is made available to you and can be uploaded to your platform for attendee access. This means that attendees can revisit presentations, discussions, and breakout sessions at their convenience.
- **Affordability** We understand the importance of cost-effectiveness. Our solution provides an affordable alternative to traditional methods of content capture and distribution. By leveraging technology efficiently, we minimize expenses while maximizing value.
- **Comprehensive Content Capture** We capture both the screen presentations and the live audio from presenters, blending them seamlessly into a coherent post-event presentation. This ensures that viewers get the full experience, just as if they were attending in person.
- **Versatile Applications** The captured content can be utilized for a variety of purposes, including continuing education, webinars, training sessions, and more. Whether you're an organization looking to provide ongoing learning opportunities or an individual seeking professional development, our platform has you covered.
- **Revenue Generation for Clients** Organizations can monetize their content by offering access to members who couldn't attend the event in person. Whether through membership fees, pay-per-view models, or sponsorships, the captured content becomes a monetized valuable asset.
- **Zero Post-Production** Unlike traditional content capture methods that require extensive post-production work, there's no need for trimming, splicing, or other post-production processes. This not only saves clients time and effort but also reduces costs associated with professional video editing services.
